

# System Requirements - Release 3.17

## XSOL Mapping

### Desktop/Laptop

- Pentium 3 (or higher), Minimum 512 MB, preferred 1GB
- MS Windows 2000, SP4; MS Windows XP SP2
- MS Installer 2.0 & MSXML 4.0 are supplied with the XSOL Mapping Installer
- MS Word 2000 (or higher). MS Word 2003 is required for advanced Release 3.17 documentation features
- Shared License Manager - requires an accessible Microsoft IIS server with MSXML 4.0 installed.
- XSOL Mapping has been validated to run on Citrix Metaframe Presentation Server

## XSOL Automation

### Server

- Operating System: MS Windows 2000/2003 Server. Preferably with MS Office 2000/XP/2003.
- Database: MS SQL Server 2000 SP3+ or MS SQL Server 2005, MS SQL Server Client Access Licenses (CALs)
- Hardware: Number of servers, as well as CPU, Memory and Disk requirements will be dependent on the intensity of processes deployed and number of shared access licenses. Please contact your local XSOL representative to confirm specific requirements.
- Note: The XSOL installation process involves the installation of Python and XSOL's OLE Automation Expression Engine on both the application and database servers.

### Client

- The XSOL Process Client requires MS Windows 2000/XP and IE6 (preferably with MS Office 2000/XP/2003). Hardware recommendations are subject to complexity of the automation system implemented, but at a minimum would require 128MB RAM.
- To create/edit and view Word/Excel 2003 documents, requires Word/Excel 2003.
- XSOL Automation has been validated to run on Citrix Metaframe Presentation Server
